

CAMERA CONTROLLER – signal flow

GND is a global net on every sheet. Double-click a block to open it.

Block 6 is electrically isolated from the rest of this board on purpose.

2 x 18650 in series -> 7.4 V nom, 8.4 V max

Power flag – ERC only.

Own cell, own switch, per DTEG 6.9.1. SW2 / SW3 take the pin-switch leads; they sit next to the pin-switch stack. All connectors latch (Micro-Fit 3.0).

These returns are deliberately NOT tied to GND – that independence is the point.
